Mr. David Archibold
Managing Director
Information & Communication Technology Authority
Alissta Towers
Box 2502 GT
Grand Cayman

RE: INTERFERENCE FROM RADIO CAYMAN

Dear Mr. Archibold:

In response to numerous interference complaints from our listeners, dms Broadcasting Ltd. recently conducted radio reception testing, using the ICTA test radios (JWIN and SONY), in the affected area located in Northward approximately 1 mile from the Radio Cayman tower.

We found that 105.3 is blocking out not only 104.1, but 106.1 and 107.1 as well. Astoundingly, we found that the interference impacts 103.8, 104.1, 104.2, 104.3, 104.4, 105.5, 105.6, 105.7, 105.8, 105.9, 106.0, 106.1, 106.2, 106.3, 106.4, 106.5, 106.6, 106.7, 106.8, 106.9, 107.0, 107.1, 107.2, 107.3, 107.4, 107.5, 107.6, 107.7, 107.8, 107.9 and 108.0 - contaminating the entire upper spectrum and impairing the radio reception of all people in the surrounding area.

One of the complainants is Orville Daniels, the program director of HOT 104.1. This, in particular, is unacceptable because, as the program director of this station, he is rendered incapable of monitoring its signal.

This is a serious issue of alarming proportions and we are requesting the ICTA to act to correct the problem immediately.

Sincerely,

Don Seymour
President
